Re: Donald A and Sharon E. Wiedeman
KHNC(AM), Johnstown, Colorado
Facility Identification Number: 17183
License File No. BL-20061012ACY

Dear Licensee:

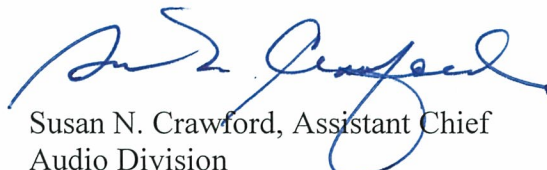

This is in reference to our letter of September 1, 2009, which requested the submission of additional information in support of the referenced application (the "Application"), pursuant to 47 C.F.R. Section 73.186(c), due to discrepancies in the KHNC monitor point distances which were brought to the attention of the staff. In particular, the following information was requested:

- 1) The original maps employed for the directional antenna proof of performance, showing each measurement point numbered to agree with the tabulated data submitted with the application.
- 2) The original worksheets on which the field strength measurement data for the directional antenna proof of performance were recorded.

We are in receipt of your response dated September 30, 2009, and received by the Commission on October 2, 2009. A review of the response reveals that none of the requested information was submitted. In lieu of submitting the requested information, you submitted an Engineering Statement prepared by Timothy C. Cutforth, of Vir James, P.C., which states that neither the original maps nor the original worksheets can be found.

Because we did not receive the requested information, we remain unable to reconcile the discrepancies in the application, which calls into question the entirety of the proofs of performance underlying the application. Accordingly, it will be necessary to file, within 90 days from the date of this letter, a new application for license, accompanied by new, full proofs of performance for the KHNC daytime and nighttime directional antenna patterns. Failure to file the requested application and supporting data within the 90 day period may result in the initiation of license revocation proceedings, pursuant to 47 C.F.R. Section 312(a)(2).

Sincerely,

Susan N. Crawford, Assistant Chief
Audio Division
